ASM
innovations in access flooring

Setting the standard in Access Flooring
with Casino® Systems designed to Win

Let us raise your
level of Business.

ASM's Casino® Division line of products is specifically designed to address the inherent needs found within a casino. Through our patented, award-winning and industry-leading raised access flooring systems, accessibility to all critical lines of communication throughout the casino are right at hand. A whole new level of flexibility is gained, allowing for complete manipulation of environments, energy savings and a foundation on which your business can thrive. Our Casino® line of products will raise your level of business.

Industry-leading strength... everywhere it counts.

Build with complete access now and flexibility for the future

Ultimate Design Load

High strength cement fill, along with steel designed in the corners where it is needed, gives ASM the best corner panel loading in the industry.

- Strongest panel design in the world
- Full formed corner design for H-D performance
- Deep drawn technology with rigorous testing

ASM has the most widely used panel design in the world and the best corner panel loading in the industry.

FS-Series Casino-Panel

ASM's High Strength Welded Steel Cement Filled Floor Panel

The perfect Casino floor, The FS-Panel system, is constructed of a welded structural steel assembly designed to accommodate ultimate and dynamic loads. Its specially formulated cementitious fill and powder coated epoxy finish give the FS panel a quiet and very solid feel underfoot. Panel systems are available in 24" x 24".

First Ever 10,000 lb Rated Concrete Filled Panel: A Breakthrough For The Access Flooring Industry

Electrical Distribution Systems

The Most Flexible Plug & Play System on the Market Today

- Patented Modular Receptacles allow for easy adding of receptacles or changing of circuits at any time
- Floor Boxes act as a distribution point with 1-in & 3-out connection ports. Hook up wall outlets, power up furniture, or jump to other floor boxes.
- Patented terminal technology to reduce voltage drop at connection points

Integrated systems for unlimited access and flexibility

Reduce the overall energy consumption of a casino by up to 20%

Voice and Data Distribution Systems

Cutting-edge technologies for a casino's serious demands

- Pre-terminated, factory tested, bundled CAT 6 Network Cabling
- Reduces installation time by 85%
- 25 Year system warranty
- Solutions available in riser or plenum rated cable, shielded and fiber varieties

Green Building Solutions

Saving energy and money while allowing unprecedented control

The optimal delivery of clean and conditioned air into the workspace is under the floor, delivered by a system of components so flexible it can be rearranged or added in minutes. (UFAD is a key element in the design of sustainable office facilities. Under Floor Air Distribution (UFAD) systems provide LEED opportunities for their ventilation effectiveness, use of materials, and controllability.) They enable facilities to maintain comfortable temperatures and ensure high indoor air quality for occupants, while reducing the costs of distributing power and data cabling.

It can reduce the overall energy consumption of a building by up to 20%. Natural convection currents reduce fan energy use by upwards of 32% and reduce cooling energy expenditures by 15%.

Industry leading load capabilities

ASM is proud to announce a break-through in our steel panel design, allowing the creation of the first 3,000 lb cementitious filled welded steel panel. We have engineered the new FS-600 to support a 3,000 lb design load with rolling loads in excess of 2,500 lbs when tested per CISCA. Casinos now have an affordable option to address and manage the ever-increasing loads being placed on the flooring system.

Innovating and constantly improving our product range

ASM's Casino Understructure

ASM's superior finishes are effective and consistent, giving a bright and polished look with superior protective properties. All ASM parts are dipped in a corrosion-resistant finish after fabrication to protect welds and raw edges from rusting.

Atlas Seismic Pedestals

ASM offers the most comprehensive variety of pedestal types allowing for durable strength in any seismic zone. This full line of pedestals can further be strengthened by bolting them to the concrete slab for the most solid access flooring systems available. ASM introduces its Atlas Pedestal Systems, designed for optimal heavy-duty support and for the most severe conditions. No other system compares for strength and simplicity.

Bet on a sure thing.

ASM continues to raise the standard
with the casino industry's leading
system solutions.

- ❖ Leading load capabilities and flexibility
- ❖ Premier integrated systems for all casino data
- ❖ Provides fast and easy relocation of gaming machines
- ❖ Allows heavy rolling loads from money carts to automobiles
- ❖ Improves occupant comfort and ventilation rate
- ❖ Quiet floor with low noise transmission
- ❖ More cost effective than overhead systems
- ❖ Eliminates 80% or more of the required duct work found in overhead systems
